ハゲタカジャーナルは査読が早い、 って聞くけど……？

耳慣れない出版社から、論文投稿のinvitationのメールを受け取ったことはありませんか(左図ではSNSメッセージの形で記しています)。
度重なる論文投稿の勧誘はハゲタカジャーナルの常套手段です。過去の発表論文に触れて賞賛するなど、巧妙に取り入ろうとする例もあります。

インパクト・ファクター(クラリベイト・アナリティクス社)と紛らわしい正体不明の雑誌評価指標によって自らの価値をアピールしたりすることがあります。

速やかな査読を売り物にしているジャーナルがあります。
査読に要する時間はもちろん学術分野によってさまざまですが、不自然なほど短時間で論文がアクセプトされるようであれば、ジャーナル全体としての品質管理に問題があるかもしれません。

甘言、さまざまな勧誘

ハゲタカジャーナルが
著者を絡めとるシナリオ

物腰柔らかく、著者の心をくすぐる

Table 1 Characteristics of a predatory journal

Note that the idea with this list is not to say that any journal fulfilling any of the points below is a predatory journal. But the more points on the list that apply to the journal at hand, the more sceptical you should be

- The publisher is not a member of any recognized professional organisation committed to best publishing practices (like COPE or EASE)
- The journal is not indexed in well-established electronic databases (like Medline or Web of Science)
- The publisher claims to be a “leading publisher” even though it just got started
- The journal and the publisher are unfamiliar to you and all your colleagues
- The papers of the journal are of poor research quality, and may not be academic at all (for instance allowing for obvious pseudo-science)
- There are fundamental errors in the titles and abstracts, or frequent and repeated typographical or factual errors throughout the published papers
- The journal website is not professional
- The journal website does not present an editorial board
- The journal website does not reveal the journal’s name
- The publishing schedule is not clearly stated
- The journal title claims a national affiliation that does not exist (or is not in that continent) or includes “international” in its title
- The journal mimics another journal title or the title of a well-known journal
- The journal provides an impact factor in spite of not being indexed in a recognized database
- The journal claims an unrealistically high impact factor (or a high impact factor beyond the top notation)
- The journal website posts non-related or non-academic articles
- The publisher of the journal has released an overly optimistic impact factor
- The editor in chief of the journal is editor in chief of another journal
- The journal includes articles (very far) outside its field of interest
- The journal sends you an unsolicited invitation to submit a paper, without absolutely no idea about your field of expertise
- Emails from the journal editor are written in poor English and often make contradictory claims (such as “You have been selected because you find convenient”)
- The journal charges a submission or handling fee, instead of a publication fee (if the paper is not accepted for publication)
- The types of submission/publication fees and what they amount to are not clearly stated on the journal’s website
- The journal gives unrealistic promises regarding the speed of the peer review process (hinting that the journal’s peer review process is minimal or non-existent)—or boasts an equally unrealistic track-record
- The journal does not describe copyright agreements clearly or demands the copyright of the paper while claiming to be an open access journal
- The journal displays no strategies for how to handle misconduct, conflicts-of-interests, or secure the archiving of articles when no longer in operation

Eriksson Stefan, Helgesson Gert. The false academy: predatory publishing in science and bioethics. Medicine Health Care and Philosophy. 2017, vol. 20, no. 2, p. 163-170.

The journal gives **unrealistic promises** regarding the speed of the peer review process

scirev (https://scirev.org/)

- 査読プロセスの透明化を通じて、そのスピード向上を期待

The screenshot shows the SciRev website homepage. The header includes the SciRev logo with the tagline "Speeding up scientific knowledge production" and a navigation menu with links for Home, About, Submit review, Statistics, All reviews, Scientific ads, Donate, Register, and Log in. The main content area is divided into several sections: "Welcome to SciRev" with a call to action to share experience; "Search for a journal" and "Search for a scientific discipline" with search bars and "Search" buttons; "Free scientific ads" section; "SciRev news" announcing 9,000 reviews; "Featured journal" highlighting Science Immunology with details on review duration and ratings; "Latest reviews" listing journals like International Journal of Occupational Medicine and Environmental Health; and a "SciRev poll" asking about the number of reviews per year. The footer contains copyright information and various links.

- 研究者が、自身の論文投稿経験を持ち寄って、各ジャーナルの査読プロセスにおける所要日数等をデータベース化
- 9,000以上の情報を集積
