

IRcuresILL

Institutional Repository cures Interlibrary Loan / Document Delivery

Back Ground

NACSIS-CAT/ILL  国立情報学研究所 目録所在情報サービス
NACSIS-CAT/ILL Catalog Information Service

- NACSIS-CAT/ILL is the nation-wide system for operating and managing ILL/DD, run by the National Institute of Informatics (NII).
- 1,109 university libraries and research institutions conduct ILL/DD over NACSIS-CAT/ILL.
- The tendency of ILL/DD in Japanese academic organization will be clear by analyzing records of NACSIS-CAT/ILL.

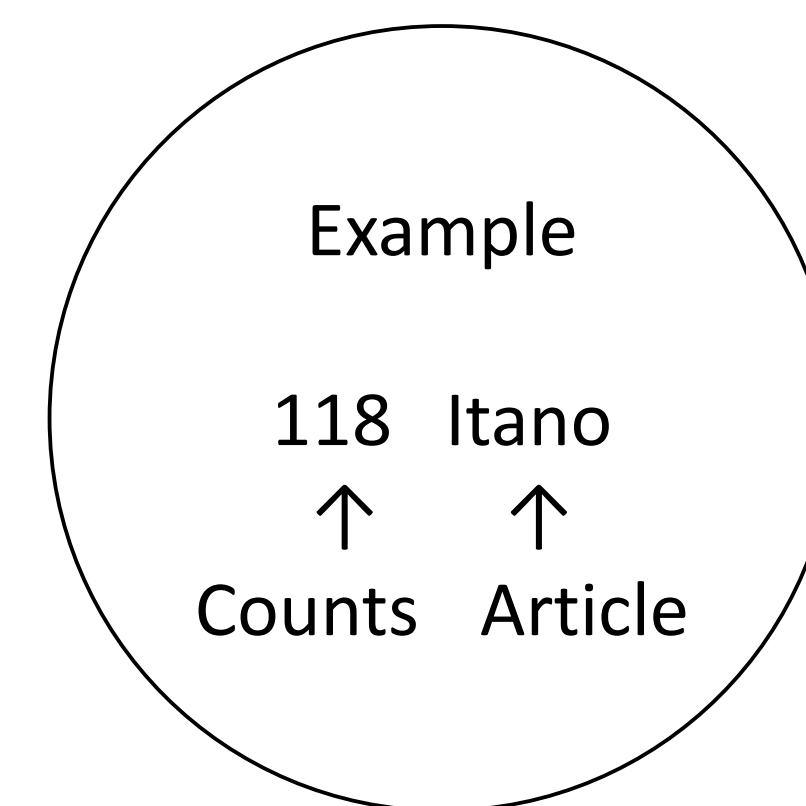

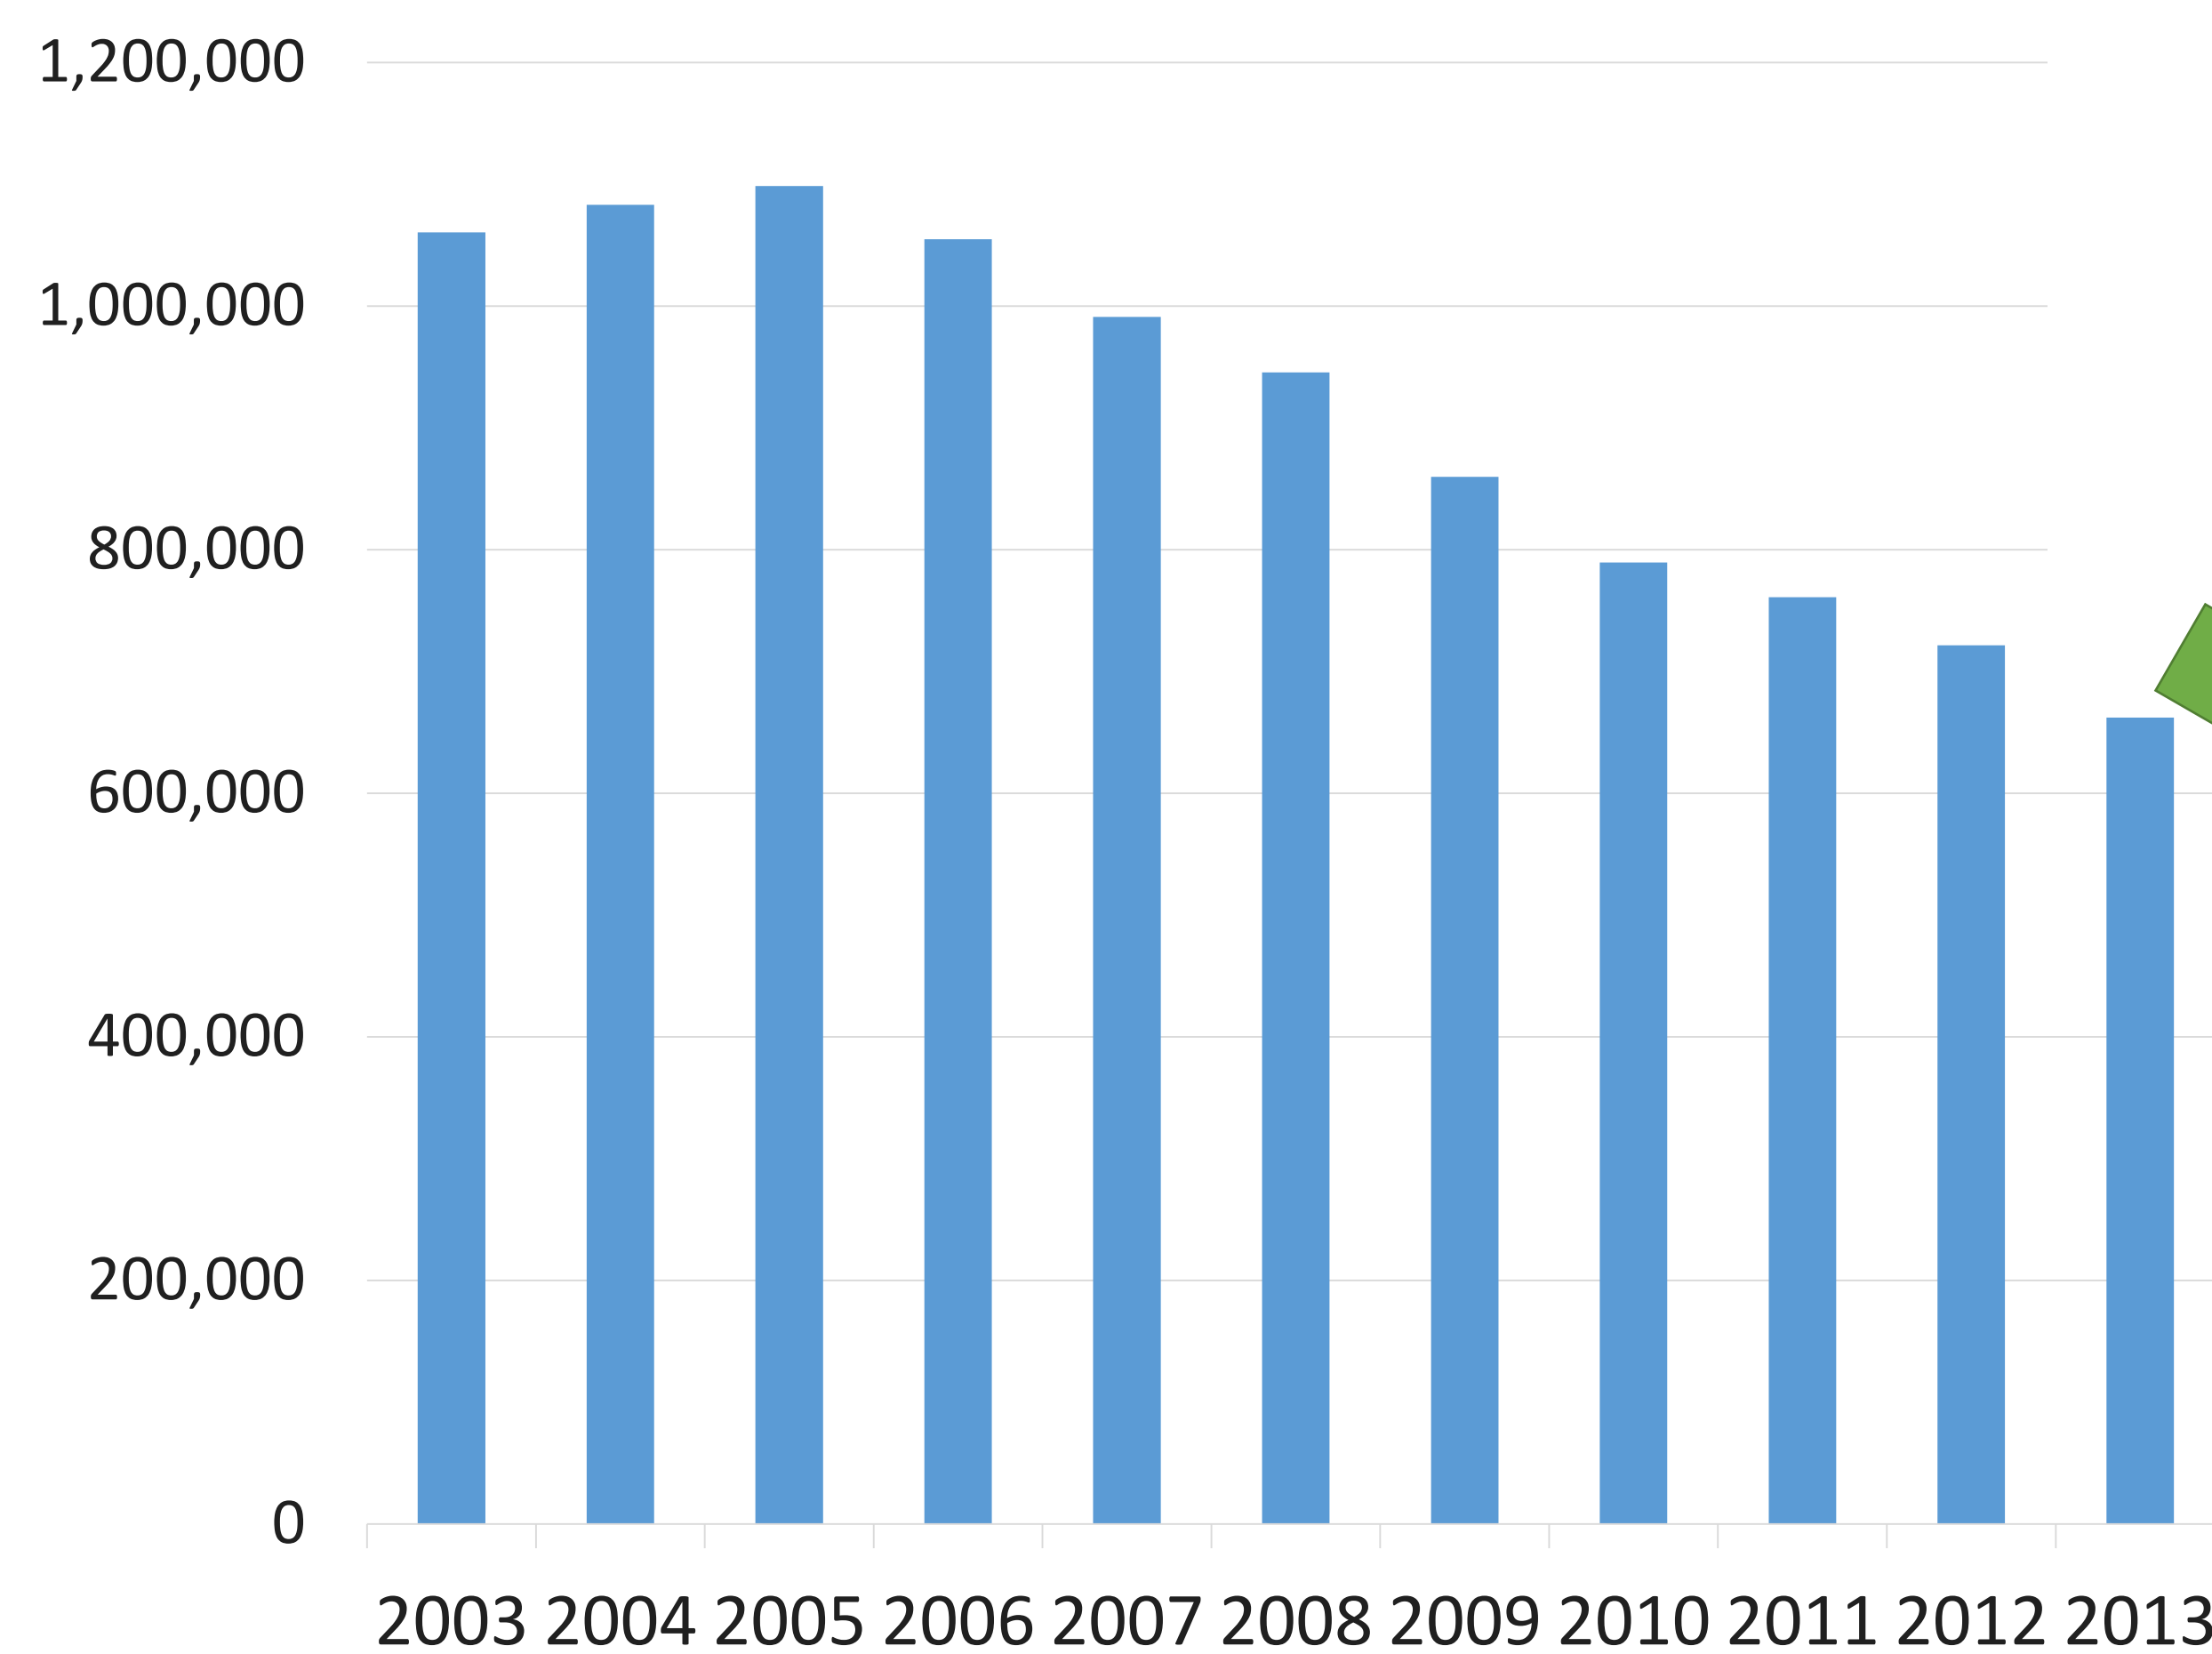

Top 5 Articles of ILL/DD

	2006	2007	2008	2009	2010	2011	2012	2013
1	118 Itano	98 Itano	85 Ozeki	82 Ozeki	73 Kamimura	60 Ozeki	57 Ozeki	60 Kamimura
2	81 Ozeki	78 Ozeki	76 Suzuki	63 Kamimura	69 Ozeki	50 Hirai	56 Kamimura	50 Koshio
3	64 Suzuki	67 Kamimura	69 Itano	57 Suzuki	48 Koshio	48 Kamimura	52 Koshio	48 Ozeki
4	60 Kamimura	65 Suzuki	58 Kamimura	50 Itano	43 Suzuki	46 Horita	46 Horita	46 Hirai
5	60 Makino	57 Makino	50 Makino	47 Hirai	42 Hirai	45 Koshio	41 Suzuki	45 Doi

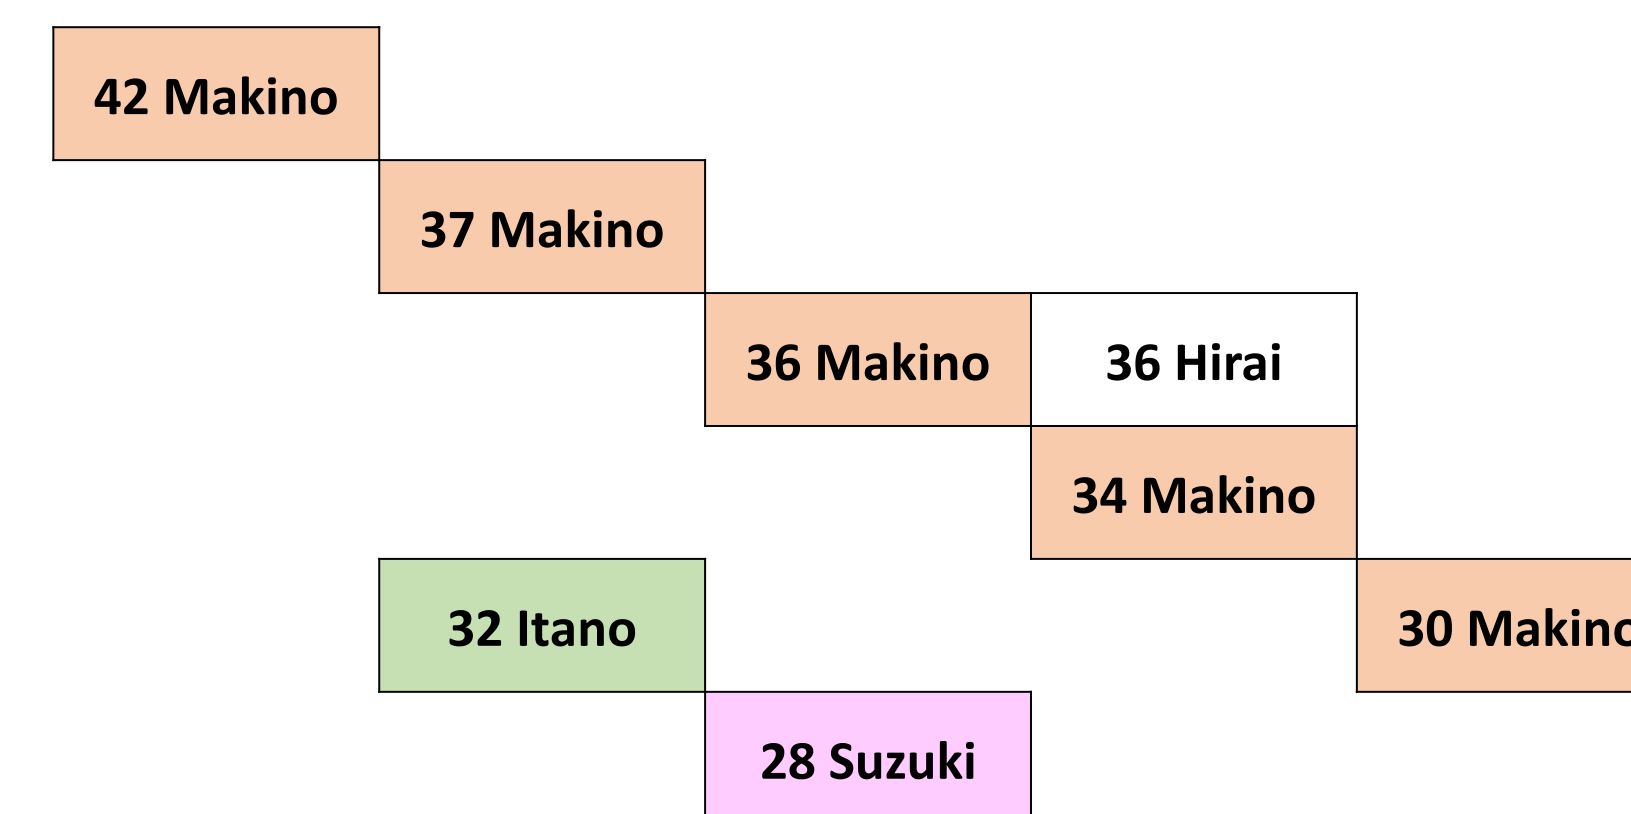

Back Ground

- “IRcuresILL” project investigated the tendency of documents which were being distributed on ILL/DD in 2006-2013 from records of NACSIS-CAT/ILL.
- Many documents on nursing and psychology written in Japanese were very frequently in circulation.
- Some documents had been copied 100 or more times for ILL/DD within a year as the largest number.

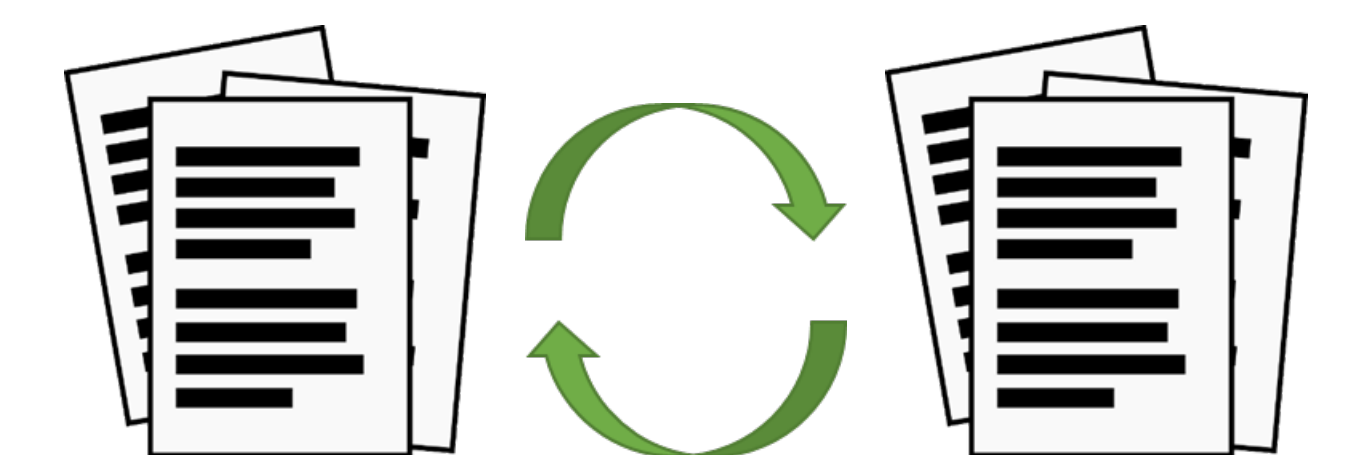

Number of ILL records

We want to accelerate

Objective

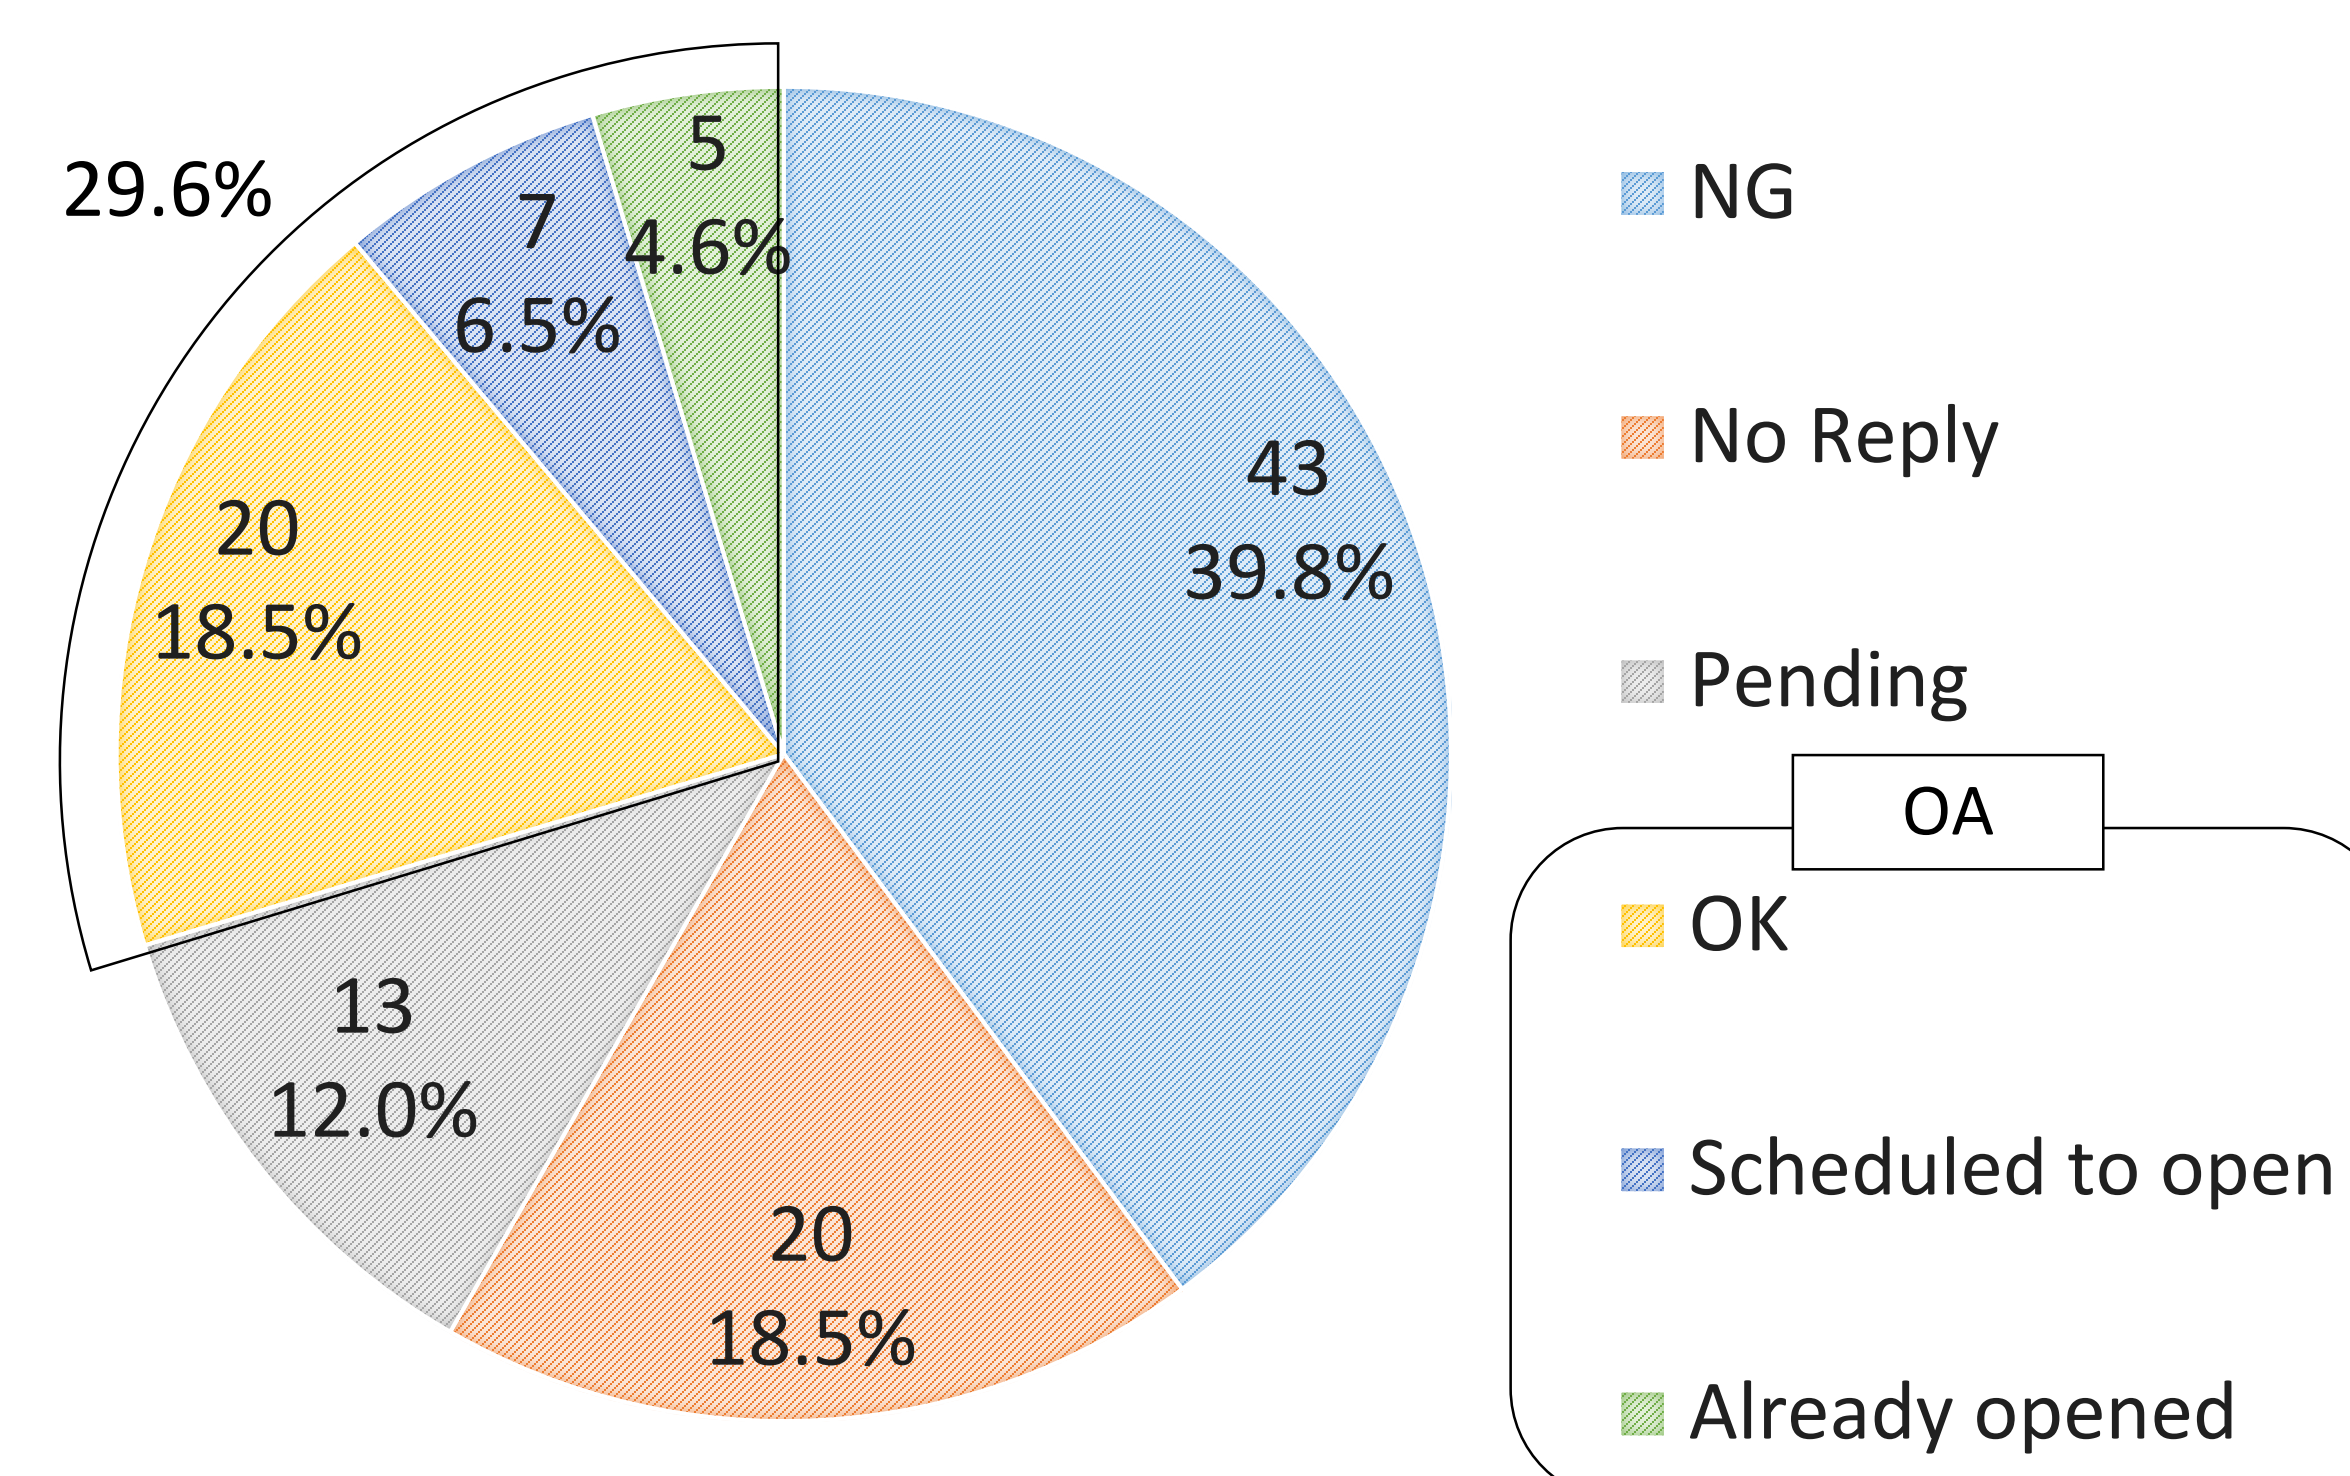

- Nursing and psychology has most frequently circulation as used to be.
- Making those very popular literatures open access.
- Respond to the potential and existing demand.
- Suppress the occurrence of ILL/DD.

Our Project

Project

- Period: Apr. 1. 2013 - Mar. 31. 2014
- Articles circulate 662,057 times in 2013
- If top 100 articles are open-accessed, more than 2,000 records will be saved.
- Make those articles open-accessed with license holders' permission.
- Promote efficiency of library duties by decreasing ILL/DD.

Result of negotiations with license holders

Conclusion

- Transition of the top layer line up is moderate.
- The real number of the top layer is the attenuation trend as a whole.
- Some articles(4.6%) were open-accessed in survey period and it has disappeared later.
- We are shortly make 20 articles to open accessed and expect ILL attenuation.
